Fencing made easy

***Fast* FENCER Jr.**

Perfect for small parent machines

FFD Jr. 1300- 1 Roll

The FFD Jr. 1300mm high carries 1 roll of prefabricated fencing wire, and is designed for small excavators.

The FastFencer Jr on an excavator is very nimble, easy to operate. The Jr is much lighter than the traditional FastFencer and not designed to go on the front of big parent machine that can deliver huge amounts of torque and tension.

The Jr includes a clamping arm to tension the wire and it pivots to either side. With the wire held tight, use the excavator to move forward to tension the wire and tie it off. The 1300mm high option suits fencing using 900mm high rolls.

- 1 X 250 - 500 metre roll capacity
- Dimensions approx: 1300mm high x 1600mm wide x 980mm depth
- Weight 220kg

Your Price

FFD Jr. 2100-1 Roll

The FFD Jr. 2100mm high option is for rolls up 1800mm with or without hinged aprons. FFD Jr 2100 can carry 250m rolls and up to 500m rolls depending on the configuration.

- Dimensions approx: 2100mm high x 1750mm wide x 980mm depth
- Weight 250kg

Your Price

FFD Jr. 1300- 2 Roll

The FFD Jr. '1300mm high carries 2 roll of prefabricated fencing wire to help farmers and contractors double their load without any extra effort.

The FastFencer Jr is lighter, designed specifically for small parent machines to make it handy for improved maneuverability in tight spots, hilly and heavily treed areas.

The clamping arm swings easily to either side, then clamp the netting tight, using the parent machine to tension the wire, hold the position, and then tie off the fence netting.

The 1300mm high option suits fencing using 900mm high rolls and up to a 250m to 500m in length depending on the configuration and type of apron being used.

- Dimensions approx: 1300mm high x 980mm wide x 980mm depth
- Weight 350kg

Your Price

FFD Jr. 2100- 2 Roll

The FFD Jr. 2'100mm high carries 2 roll of prefabricated fencing wire.

Set up the same as the 1300mm high, the 2100mm is ideal for farmers and contractors that need to do exclusion fencing.

The ability to carry 2 x 1800mm high rolls plus hinged apron from 250m to 500m rolls depending on the configuration means you can fence 1 kilometer in one pass.

Saving so much time!

Just check with us whether your parent machine is suitable.

- Dimensions approx: 2100mm high x 21000mm wide x 980mm depth
- Weight 400kg

FastFENCER Jr.

Swing the clamping arm from one side to the other side

Set Simply remove the two pins top and bottom, swing the clamping arm to the other side, put the pins back in, and away you go! So Easy!

- Removing the two pins to pivot the clamping arm across, means no need to drag or do any heavy lifting. The FastFencer Jr. Making it so easy!

Jr. providing the option of carrying 1 roll or 2 rolls for small parent machines

Set Designed for farmers and contractors that want the option of one and two roll machines, the FastFencer Jr. fits the gap that hasn't been available until now. The new FastFencer Jr. is lighter and smaller which makes it ideal for excavators, skid steers, small tractors and even mini diggers for more nimble movement on the job.

Why have a pivot arm?

To avoid any potential problems when the operator may find the need to go in the other direction. Swing the arm with no heavy lifting!
